PRIMARY EXAMINER

Continuation of 5. does NOT place the application in condition for allowance because: Applicant argued that Keeth does not disclose at least one enable/disable circuit for selectively connecting and disconnecting at least one portion of the respective macro from the integrated circuit system. However, Keeth discloses enable/disable circuit for selectively connecting and disconnecting at least one portion of the respective macro from the integrated circuit system (e.g. see col. 3, lines 55-59). Therefore, applicant's arguments of claims 1 and 12 do not distinguish over Keeth.
